

1) How did we select the team activity?

After our first MSD class we started going to the commuter's lounge after every class together as a group. The walk there and the time we spend hanging out in the lounge has allowed us to bond as a group outside of MSD class.

2) How did we ensure no team members felt left out?

We were talking to each other the whole time and bonding over things we have in common.

3) What is one new thing each team member learned about the team as a result of this activity?

Eva: I learned that although we have many different interests, we know a little about everyone's interests and are able to talk about them.

Drew: Throughout this activity, I learned about everyone's outside activities and was able to bond with those who had similarities and learn about and appreciate those with differences.

Tanner: I learned everyone's educational and personal interests, as well as if they were coffee / caffeine addicts like myself.

Nsadhu: I learned about each person's interests and that we are looking forward to working together and getting this project done successfully.

Ian: Through this activity we were able to take a step back from the project, and we got to talk to each other as normal people rather than just as project mates.

Luke: I learned that everyone is looking forward to what we can accomplish this year.
